WORK EXPERIENCE

KUPIBILET.RU - Frontend Developer & Frontend TeamLead   *Apr 2020 - Present*   *Saint-Petersburg, Russia*

Project: Online Travel Agency website for searching and buying air tickets with 2 million active users per month

→ Added i18n to website: the company entered international markets
→ Migrated project to TypeScript and covered significant part of complex logic with static types
→ Interviewed and onboarded frontend developers
→ Minified bus factor by documenting project architecture and deploy processes
→ Improved frontend infrastructure by updating all frameworks and libraries to latest versions
→ Set up AB testing infrastructure with Optimizely
→ Minified Webpack bundle size by removing legacy dependencies

KUPIBILET.RU - Frontend Developer & Fullstack Developer   *Sep 2018 - Apr 2020*   *Saint-Petersburg, Russia*

→ Improved search form rendering time in ~3 times by refactoring it with React hooks
→ Developed from scratch frontend and backend for company's Affiliate Network website with nodejs and React, worked in team of 4 developers
→ Added caching for rendered html+css on SSR, which improved site loading time in 2 seconds
→ Architected and developed new search engine results page
→ Worked on several nodejs services: added integration and unit tests, CI setup from scratch
→ Improved frontend code-base by adding CI scripts: linter for only changed diff, scripts for analyzing unused code

EMLID - Frontend Developer   *Feb 2018 - Sep 2018*   *Saint-Petersburg, Russia*

Project: ReachView - web app for RTK receivers for survey and mapping

→ Developed app core modules and covered them with unit tests
→ Migrated legacy modules from jQuery and Angular.js to Vue.js

WebLab Technology   *May 2017 - Oct 2017*   *Remote work*

Project: Shaman - web application for sales meetings with presentations

→ Developed a settings page for user company and their presentations
→ Covered user flow with e2e tests

EDUCATION

ITMO University   *Sep 2016 – Jul 2020*   *Saint-Petersburg, Russia*

BS degree in Computer Science

SKILLS

JavaScript	TypeScript	Webpack	Node.js
HTML	React	Git	Unit Testing
CSS	Redux	CI/CD	End-to-End Testing

SIDE PROJECTS

js-confetti: TypeScript Confetti library that supports emojis, published to NPM
